***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

The Examiner has carefully considered the claims 1, 3-22, 29 and 31-47. The computer implemented method and corresponding system for displaying a cursor comprising the steps/means for obtaining a cursor image indication and an ancillary image (shadow image) indication and create a real time composite image indication as claimed was not taught or suggested by the prior arts. Although Martin et al. in view of Dawson et al. shows obtaining the cursor image indication and the ancillary image indication and forming a composite image indication indicative of a composite image containing both the cursor image and the ancillary image; however, none of the references teaches or suggests the step of creating separately a real time shadow image from the cursor image. None of the references teaches or suggests how a shadow image is created in real time.

With such limitations, the Examiner deems this application in condition for allowance over the prior art made of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions<sup>0</sup> should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
